Subject: RE: New IDIQ in place for NAS -- invoice question

Tina,

Thank you for the clarification.

Cliff

Hi Cliff,

I may have misled you with my comment – there is no issue per se. For the task orders that were funded a while ago, the work was only recently completed or is still in progress. This creates the perception that we are not able to spend our money. I think we will be fine soon and caught up for the most part, except for formaldehyde.

Very excited to move forward!

Tina

Tina,

With respect to your concern on invoicing, it seems that the NAS has prepared invoices for all of the BEST tasks under the current IDIQ. Can you send us any additional information about work that EPA believes hasn't been invoiced? For example, are there specific task numbers that have not been invoiced for? I am copying Laura Llanos and Malika Mukhamedkhanova of our financial team so they are in the loop and can answer questions while I'm out.

Cliff

Great news, Cliff! I think our team has the new task order in place and ready to move on it. So, I'd say it's imminent. We are a bit log-jammed because we need the NAS to invoice us for the work already conducted and EPA needs to pay those invoices, so we can show some movement in the resources. But hopefully, that will happen soon.

Have a wonderful vacation! See you on the other side.

Thanks,

Tina

Tina,

As you may have heard, the new IDIQ contract was signed, so we are all set for tasking. Do you have some idea about when we may expect tasks? I have also checked with Lek on the TSCA question.

Fyi, I will be on vacation July 23-31, but Susan Martel should be available to answer any questions in my absence. Please let me know if you want to talk before next Tuesday.

Thanks,
Cliff
